

## ALCOR iSED® vs. YHLO Vision & Vision Pro

- ✓ **Minimal sample requirements, 100µL test volume**
- ✓ **Automated workflow efficiency**
  - 20 second TAT, high throughput
  - Primary tube sampling provides operator safety
  - **Zero** daily maintenance
  - Sample traceability and secure LIS results transmission
- ✓ **Accurate results not impacted by sample variables**
- ✓ **Seditrol® QC for quality assurance**
  - Stable, human based, performs like your patients

	iSED®	YHLO Vision	YHLO Vision Pro
<b>TAT</b>	20 seconds	20 minutes	20 minutes
